LETTER TO OUR VALUED CUSTOMERS:

2018 was yet another year of tremendous growth for Rear View Safety, and we could not have done it without the help, support, and patronage we received from you – our amazing customers.

Over this past year, we dedicated ourselves to strengthening where we were already strong and growing in new areas, all part of our consistent goal to make you, your vehicles, and our roads that much safer. Something that increased exponentially this year was the adaptation of integrated solutions, in particular camera systems with integrated sensors. While backup cameras are a huge help, many operators are trained to use their mirrors when reversing, and we all know the saying about old dogs and new tricks. Adjusting to camera systems can be hard, and even with rear visibility, backup accidents can happen. With an integrated sensor system, the driver is alerted when something is behind them, and this draws their attention immediately to the monitor. Integrated solutions like this maximize the utilization of safety systems and make sure our customers are getting the most out of their safety solutions.

We know that unfortunately, accidents caused by others on the road can not always be prevented. For that reason, we greatly expanded our Mobile DVR program by growing our DVR team, streamlining department leadership, and investing in the hardware, software, and support that we offer. Our aim is to protect our customers from all sides; preventing accidents from happening, and having the real story for accidents that could not be avoided.

We have grown in many ways this year. We now offer over 500 products, all in the dedicated field of vehicle safety. While nurturing our relationships with our committed customers, we were proud to welcome thousands of new customers to the Rear View Safety family, including some of the largest fleets in the country.

Despite our growth, our dedication to quality, fair cost, and above all exceptional service has not lessened. We remain strong in our commitment to treat all of our customers, from the newest to the oldest, from the single vehicle owner to the nationwide fleet, with respect, courtesy, and unwavering dedication.

Thank you for your help in making Rear View Safety an industry leader in vehicle safety. Thank you for sharing in our vision and our passion. Together, we are making the roads safer for everyone, one system at a time.

Sincerely,
Gila Newman,
Vice President

ABOUT US

WHY CHOOSE US?

We believe in making the world a safer place for drivers and pedestrians because we care about people. We do this by owning our entire manufacturing process, by having a deep understanding of the vehicle safety field and by using only the highest quality materials and technology. We create, innovate and manufacture vehicle safety solutions that save lives and help reduce your operational costs.

OUR MISSION

AT REAR VIEW SAFETY WE MAKE THE ROADS A SAFER PLACE BY PROVIDING OUR DRIVERS WITH THE HIGHEST QUALITY AND MOST PERSONALIZED VEHICLE SAFETY SOLUTIONS.

OUR STORY

Almost immediately after its inception, Rear View Safety gained major market share forcing the backup camera industry to lower their prices. This drop in cost to consumers accelerated sales of backup safety systems and brought increased safety to roads nationwide.

Widely regarded as the highest quality and most cost efficient backup camera provider, Rear View Safety has greatly aided in reducing vehicle accidents and prides themselves with having the highest grade customer care in the entire industry. We have the industry expertise to answer any question you may have in selecting a safety solution for your vehicle, general installation information, customization options, and we guarantee 100% customer satisfaction.

Since servicing some of the largest companies in the world, Rear View Safety has become the fastest growing commercial backup camera system supplier on the market. Not just a reliable supplier of backup camera systems, Rear View Safety also provides a wide variety of other safety solutions, including Fatigue Monitoring Systems, Proximity Sensor Systems, Mobile DVR's and Dash Cameras. We are primed and ready to help every customer create a safer and more aware driving experience.

OUR PROMISE

Rear View Safety cares about our customers. That's why we apply our expertise on safe driving to every industry that needs it, including: School Bus, Transit Bus, Commercial Trucking, Motorhome/RV, Emergency, and Industrial.

SAFETY

Safe driving is our mission. Because we want to protect drivers, pedestrians and vehicle owners, we utilize the most innovative safety technology in every product.

SERVICE

Customers come first and satisfaction is guaranteed. Our premise is simple: tell us what you need. We accommodate each industry to ensure safety and satisfaction.

OUR PARTNERS

REAR VIEW SAFETY: PART OF THE SAFE FLEET FAMILY

Rear View Safety is a proud member of Safe Fleet, a growth focused organization who manage a large portfolio of industry leading brands focused on improving operator, pedestrian and driver safety.

The power of Safe Fleet lies in their thoughtful partnerships. By bringing together industry leaders in fleet safety technology, telematics technology and ergonomic vehicle technology, the company provides complete all-in-one solutions for the RV/bus/rail, truck/trailer, work truck, emergency, and industrial/military markets.

Safe Fleet is a global provider and market leader of safety solutions for fleet vehicles. The company was formed in 2013, when The Sterling Group acquired ROM and SMI from Century Park Capital. Safe Fleet designs, manufactures and sells best in class safety related products for the bus/rail/RV, truck/trailer, work truck, emergency, and industrial/military markets. Using their unique portfolio of innovative industry leading brands, Safe Fleet provides all in one integrated control and monitoring solutions for these markets. With over 1,000 employees and 17 brands, Safe Fleet is at the center of where safety and technology coalesce in the automotive industry.

SAFE FLEET BRANDS:

CAMERAS

Here at Rear View Safety, we take road safety extremely seriously; our cameras are #1 rated and can eliminate blind spots on all sides of your vehicle. We offer a wide variety of camera options, including commercial and industrial cameras, consumer cameras, CHMSL cameras, OEM cameras and specialty cameras.

"Looking forward to another year working with Rear View Safety – great discounts, easy ordering and prompt delivery, and if you can't find what we're looking for, Rear View Safety help is always at hand at the other end of the phone. We were pretty impressed when we asked to meet Joseph for help in a project that was important for Cambli, and he showed up 2 days after with many ideas and solutions. Thumbs up for the Rear View Safety team!"

"My name is Geoffry Barone and I work for Cox Fleet Services in Warwick, Rhode Island. We have been dealing with Rear View Safety for approximately 4 years now. Since then, it has been a pleasure to work with this company. Not only is their team very knowledgeable about the products they offer, they are all always very friendly. They seem to go above and beyond our expectations when we have issues or questions regarding an installation process or troubleshooting an issue. This is great because it is very important that we minimize the downtime of our fleet due to government regulations and the sake of our own customers. We couldn't ask for better service and quality. Keep up the good work."

WIRED CAMERA SYSTEMS

Our backup camera systems boost visibility and eliminate blind spots on vehicles large and small. All components of our wired systems can be mixed and matched so that any camera can go with any monitor, and vice-versa. To help ease installation, all our wired camera systems now come standard with a power harness instead of a multiplexer.

WIRELESS CAMERA SYSTEMS

A wireless connection between the backup camera and monitor means that with these systems, there is no need to run cabling through your vehicle. This is usually the most difficult part of installation and cutting it out cuts the install time in half!

RVS-155W
SimpleSight™ Wireless Backup Camera System | 5" Single Screen Monitor

- 5" LED Digital Monitor with Suction Cup Mount

A night cityscape with a large lightning bolt striking down from the sky. The city lights are visible in the foreground and middle ground, with a prominent tower and several skyscrapers. The sky is dark purple and blue, with the lightning bolt being a bright yellow-white. The text is overlaid on the left side of the image.

" Zenith Motors is now outfitting every one of our 100%-electric vans, trucks, and buses with a RVS camera system before they are delivered to the customer. We have close to a hundred cameras in the field now coast-to-coast and the quality and reliability is superior to even much more expensive systems available from vehicle OEMs. The large display screen gives a quality driver experience with excellent picture quality and automatic dimming, and the modular system allows for great flexibility and easy installation."

"The RVS back up monitoring system has been used in our products for over 18 months with great success and customer acceptance. The supporting technical service and day to day support has been outstanding and continues to be a strength of the RVS overall value.

We are proud to be an OEM who provides a solid and quality product, and will continue to do so with supporting quality materials and amenities such as the rear view safety systems."

PROXIMITY SENSORS

Proximity sensor systems either work independently or harmoniously with backup camera systems. These systems detect and alert drivers to obstacles in their blind spots.

RVS-112-W

Waterproof Backup Sensor Reversing System

- Completely Waterproof System - Install All Components outside
- Four Sensors Mount to Vehicle's Bumper
- Intelligent Sensors - Ignore Stationary, Permanent Objects

RVS-115-W

Backup Sensor Reversing System (Waterproof)

- Independent System - Comes with Everything for Install
- Four (4) Waterproof Sensors Mount to Vehicle's Bumper
- LED Display Sits On Dash for Visual and Aural Alarms

RVS-117

Pedestrian Curbside Detection System

- Available On Driver or Passenger Side Configurations
- Removes Blind Spot from A-Pillar
- Ideal for Buses or Other Heavy-Duty Vehicles

RVS-118

Blind Spot Sensor System

- Independent System - Comes with Everything Needed for Install
- Two Waterproof Sensors Mount to Either Side of Vehicle
- Visual Alert Buttons Mounted In A-Pillar to Be Seen Easily

RVS-122

Microwave Blind Spot Sensor System

- Microwave Sensor Technology - Mounts Behind Vehicle Paneling
- Mounts Easily Without Drilling
- Perfect for Blind Spots on RV's

RVS-123

Radar Object Detection System

- Detects Objects and People in Blind Spots Up to 23ft
- Alerts Operator with Both Visual and Aural Alarms
- Built for Construction Vehicles - Multiple Detection Modes

RVS-125

SenseStat® Wireless Obstacle Detection Sensor System

- Detects Objects and People in Blind Spots Up to 23ft
- Alerts Operator with Both Visual and Aural Alarms
- Built for Construction Vehicles - Multiple Detection Modes

NEW
for 2019

RVS-128 Advanced Blind Spot Sensor System

- Microwave Sensor Technology
- Long Detection Range - Up to 82ft
- Easy Sensor Installation - Surface Mounted
- Visual Alerts Mount in A-Pillar
- Waterproof Sensors - Mount Outside the Vehicle

DRIVER FATIGUE SYSTEMS

Our Driver Fatigue Systems are designed to combat drowsy driving and help save lives from this serious hazard. These devices mount facing the driver and give off audio warnings when drowsiness is detected. Setup for these devices are incredibly straightforward and installation takes just minutes so that you can be driving safer in no time!

NEW
for 2019

RVS-335 Driver Fatigue System

- Alerts Drivers upon Detecting Drowsiness
- Advanced Algorithms Allow System to Work in All Conditions
- Works Day and Night and Even While Driver Is Wearing Glasses

RVS-350 Driver Fatigue Monitoring System

- Alerts Drivers upon Detecting Drowsiness
- Advanced Algorithms Allow System to Work in All Conditions
- Detects Driver Distraction

RVS-350P Professional Driving Fatigue Monitoring System

- Alerts drivers upon detecting drowsiness
- Driver Facing Camera - Connect to the RVS-5550 DVR
- Detects Driver Distraction

RVS-350-WL Warning Light For Driver Fatigue Monitoring System

- Easily Mounts to Roof of Vehicle
- Not Independent System - Must be Connected to RVS-350/RVS-350P Driver Fatigue Monitoring Systems
- Warning Light Flashes When Driver Fatigue Alarm Activates

RVS-350-VC Vibration Cushion For Driver Fatigue Monitoring System

- Placed on Driver's Seat
- Not Independent System - Must Be Connected to RVS-350/RVS-350P Driver Fatigue Monitoring Systems
- Vibrates When Driver Fatigue Alarm Activates

DASH CAMERAS

Dash cameras mount to a vehicle's windshield and record everything seen out the front of the vehicle. Their purpose is manifold; they come in great use in case of an accident for insurance reasons or to present to a court, they can be used to dispute traffic tickets and to protect against police brutality and they are a great way to record all the priceless moments that happen on the road.

DR590-1CH Blackvue 1 Channel Dash Camera

- Full HD Sony STARVIS™ Image Sensor
- Full HD (1920 x 1080p) 60FPS Video Recording

- Full HD (1080p) Video
- Perfect for Recording All Your Riding Activity
- Extremely Light and Built for Speed

"The team at Rear View Safety has been a big part of our success of not having backup accidents. Their outstanding service, great pricing and extensive product line makes it easy to do business with them. We benefit with lowered accident cost, increased driver productivity and morale. Our drivers often comment to me how they really appreciate the backup cameras"

- Car Horn Activated If Alarm Is Not Turned Off After 40 Seconds
- Button To Turn Off Alarm Located In Backseat - Ensures Driver Is Visually Reminded of Cargo when Alarm Is Disabled

RVS-SA101

Headrest Hook With Magnetic Phone & Tablet Mount

- Installs to Any Headrest In Minutes
- Holds Bags Up to 40 lbs
- Keep Kids Entertained for Hours

BTA-CT65-VP

PinGo 3-in-1 Wireless Car Locator

- Vehicle Locator
- Phone Reminder
- USB Charger

TESTIMONIALS

City of Ottawa

"The City of Ottawa recently decided to install backing cameras in the buses for its Para division to help reduce accidents and improve safety. Rear View Safety was chosen to provide the cameras for our fleet because of the low cost and high quality of the product, as well as the excellent warranty customer service they provide."

Ken Gordon, Superintendent, Para Transpo Service Delivery

Water Treatment

"Culligan has purchased cameras to help reduce back up accidents and improve safety. Rear View Safety was chosen to provide the cameras for our fleet because of the low cost and high quality of the product. We have had nothing but good results with them and cut our backup incidents in half."

Travis Zwingli - Culligan Water Canada

Municipality Vehicle Upfitter

"We've installed Rear View Safety's mobile DVR's on our customer's school buses and they couldn't be happier with them. Installation is pretty straight forward and the systems come with great flexibility and audio recording as well. The added security and peace of mind that comes with everything being recorded, really is a great benefit."

Charles Greenwald, Newgate Security

Industrial

"We are using these camera systems in an unusual situation. On what's called a side-loader. It is basically a fork lift with the forks on the side. The mast on these sideloaders create a large blind spot in front of the equipment. My operators challenged me to find a system that would work and eliminate the blind spot. I ordered one of these camera systems and installed it. Immediately I got positive feedback and have had several employees comment that they would like one for their personal vehicle. If you are in any type of industry using mobile equipment that has blind spots I would highly recommend these systems, they are well made and very durable. I appreciate Joseph helping me with the very minor issue we had (we needed a 24 volt multiplexer) and he immediately shipped one to us. Very fast shipping, excellent customer service, and an excellent product."

JD Wagner, Bonnell Aluminum
